Now, what is CPA marketing really about?

**You're about to find out.**

By now, you should have already understood that the internet is actually able to make money for you. Evidence is clear in the forum to you that some people are actually able to make money off it while others are struggling to discover how, where, why and what.

**This is what I am about to share with you.**

As I've mentioned, there're no direct conflicts in our interest so I am willing to let you in on this insider information but.. it comes with a price; that is the price of the system – to help you and to help me get closer to our dreams. (Creating the system was no mere feat.)

About CPA marketing, I will explain it as simple as I can to you and how many thousands of people are now rushing and scrambling to grab all that huge pile of money off the table.

This is you.

You want to make money. You want to make some real money off the internet. You're not sure how, you're maybe halfway there, not making any progress; whichever the case that suits you.

How we go about making some money off CPA marketing?

Firstly, we need **a Market place** or an agent so to speak and that market place is an affiliate network where thousands and thousands of offers and products are being placed there for you to promote and sell and by selling these products/offers, you get to earn a commission **AND THAT IS HOW YOU EARN REAL MONEY.**

You act as a third person, simply, a middle-man or a salesperson to sell these things. You do not need to own these items; some offers include simple surveys and sometimes even real products like coffee, cigars or antivirus software. These are just some of the examples of things you can find on the marketplace.

The relationship of how all this work can be broken down into this small picture diagram.

You, the affiliate marketer.

The marketplace, known commonly as an affiliate network.

And of course, the money involved.

You as an affiliate marketer will pick an offer that you're interested in doing and you will start selling it online and when you make a sale, the money is produced from the advertiser. Let's say for example, you're selling a XYZ Baby shampoo. XYZ is the company that deals with the affiliate network and allows their product to be put on the affiliate network for affiliates like you to sell it for them.

You start to see the picture?

Company approaches Affiliate network -> Affiliate network -> You.

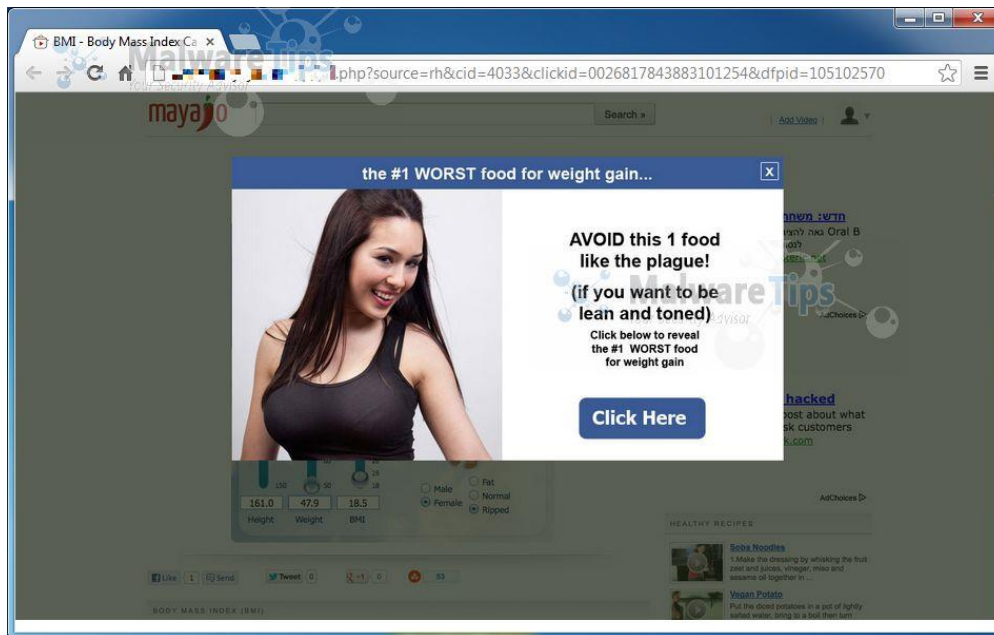

That is why it is called a "market-place". It is a market place full of products and offers, sometimes, even simple surveys or email opt-ins.

And every time you complete the requirements, whether to sell the product or to complete the survey from real people, you get **PAID**.

That is where the money comes from.

The fascinating part is, you do not need to meet ANY of these people or to leave your house or anything like that. You work at the comfort of your home, maybe 30mins to an hour a day. That is the power of the internet. This way, you're able to create a passive income flowing through your bank accounts every day, every month, every year.

What we're going to do is simply show the customers the advertisements, if they like it, they'll buy it and this is what the system is going to teach you. I'm sure you've seen internet advertisements before, in the form of pop-ups, banners and some other different styles. Here's a few.

Now, the problem is, how are we going to do it?

How can you help me earn some real money?

In the system, I will be going to teach you multiple ways of promoting your product.

- You don't need any online marketing experience at all...
- You don't need your own product or web site...
- Or to already have a credible reputation...
- You don't need to sell anything or be a salesperson...
- Or have any technical know-how or graphic design skills...
- And you don't need to go through a steep learning curve!

It is a step-by-step process coupled with a few of my best tools and software that I use to maximize my earnings and to record data.

It will NOT be easy if you do not put in effort, I'm going to warn you about this time and time again. Unless you're really determined to get wealthy and earn money, be prepared to work for it. This is as easy as it gets, any easier, it'd probably be illegal.

I will teach you all the ways there is to tackle the sales and make REAL conversions, money will start rolling in and you will be smiling.

I promise.

We'll need our tracking software to track our data, what works and what doesn't and to effectively cut off losses and scaling profits.

We'll indulge in paid traffic or paid media as some call it, meaning, we make OTHERS help promote the product for us and we reap in the profits without doing anything.

Of course, did I mention, I will also help you to get APPROVED in the Market place which in reality, are very hard to get into.

I mean, if you're talking about sub-par affiliate networks, then sure, it might be easy but I am talking about renowned and effective affiliate networks. They **PAY ON TIME**, commands the **HIGHEST PAYOUTS** across other affiliate network and **HAVE THE MOST EFFICIENT SUPPORT TEAM**.

I will teach you on how to get approved on all these networks.

Once again, let me just run through what you will receive.

- **LIFETIME SUPPORT** I will answer every single question you have about the system pre-purchase and post-purchase. Contact details at the end of Sales letter.) (PROOFS AND EARNINGS will be sent through SKYPE/EMAIL when asked since the new WF rules don't allow postings of such now.)
- **EXTENSIVE KNOWLEDGE ON THE WHOLE CPA GAME.** We will be doing media buying, also known as paid traffic. (It is the fastest method whilst if used correctly, is a lethal tool in BULKING up your ROIs.) TOPICS/CHANNELS INCLUDE: DISPLAY, PPV, PPC AND BONUS STRATEGIES AND TACTICS.
- **I WILL SHOW YOU DIRECTLY WHERE THE MONEY IS LOCATED;** best converting geo-targets, offers and niches to focus on together with a series of comprehensive tools to TACKLE them. (keyword tools, best converting banners and where to find them.)

Matthew.
